

Software Developer

Marquis has a unique offering of software tools and services that enable new workflows in the movie, post-production and broadcast industries. We are looking for a programmer to join our software development team. Marquis is a small, dynamic company and the candidate will be involved in all aspects of product development and bespoke software solutions.

Marquis develops software for the media industry, which is used by many well-known organisations such as BBC, ITV Netflix and Dreamworks to name a few. Prior knowledge of media workflows would be helpful but not essential.

Duties

- Software design
- Development
- Production of documentation
- Debugging and assisting support staff
- Other ad-hoc duties

Skills and Experience (most important first)

- Good C# / .NET skills on Microsoft Windows
- UI development for web client and desktop applications
- Experience developing web clients using JavaScript or Typescript
- Client-server applications using REST
- Experience working with large development solutions (>100 sub-projects)
- Experience with cloud storage SDKs (e.g., those from Amazon, Microsoft etc)
- SVN or other source control systems
- Development of desktop applications for Apple MacOS
- Experience in the TV broadcast industry, particularly knowledge of video editors

General

- Good written and spoken English
- Ability to present ideas and plans
- The ability to integrate into a small, close-knit team.
- The ability to work under own initiative.
- Methodical / systematic

We offer flexible working with the office based in Pangbourne, near Reading (www.marquisbroadcast.com). This is a permanent position for immediate start. UK work permit holders only need apply. Salary up to £55,000 p.a. depending on experience.

Please apply via email to lisa@marquisbroadcast.com attaching your CV and a covering letter
We will not be accepting candidates from agencies.
